

# How Customers Use VIZOR

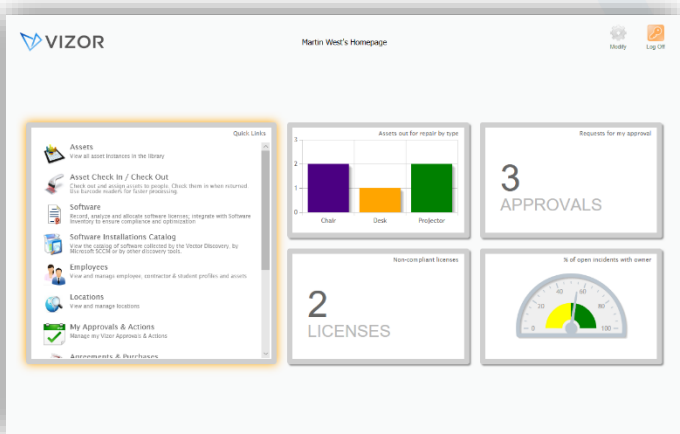

## The Public Sector

A renowned **Canadian teaching hospital** streamlined the process of on-boarding 1500 residents per year with VIZOR. The unique provisioning capability was used to allocate specific software assets and resources based on the residents' roles within the hospital

Unable to properly monitor valuable software assets, a **Federal US Department** chose VIZOR as their proactive solution to obtain reliable data and make informed decisions for purchasing software assets.

A **School District on the West Coast of the United States** is using VIZOR to streamline the provisioning of hundreds of newly acquired Chromebooks. VIZOR will manage the requests, approval, procurement, maintenance, and recycling of the devices throughout their lifetime.

After struggling with the limitations of Excel Spreadsheets, premium **Government Healthcare Insurance Company** chose VIZOR to extrapolate existing data to execute monthly renewals and push notifications to their customers.

The IT department of an **English School Board**, located in Quebec, Canada, uses VIZOR to track and monitor incidents as well as oversee change management. VIZOR also serves as a portal for students, teachers and staff to create tickets and request assets.

# How Customers Use VIZOR

## The Private Sector

With the help of VIZOR's flexible configuration capabilities, an innovative **club management software company** is provisioning and maintaining their customers' software, controlling individual details like installations, and improving the response rate of their customers' inquiries and incidents.

An award winning **European Law Firm** maximizes IT technician effectiveness and user productivity by monitoring asset status and tracking asset location with VIZOR Assets' barcode scanning workflow.

Another **European Law Firm** is leveraging their existing Microsoft SCCM infrastructure with VIZOR to transform static data into valuable information to drive informed purchasing decisions.

North American **Civil Engineering Company** leverages investment in Microsoft SCCM by choosing VIZOR to enhance the asset lifecycle management including requests, approvals, provisioning, procurement, recycling, and retirement.

A North American **Hospitality Management Organization** benefits from improved operational efficiency by using all VIZOR modules to streamline IT tasks including ticket and problem management.
