Integrations

Avoid data re-entry and duplication by integrating VIZOR with your existing IT processes and infrastructure.

Active Directory and LDAP Directories

Single sign-on, authenticate logins against your Active Directory (AD). Assign hardware and software assets to AD users. Create new Active Directory accounts with specific privileges for new employees and then revoke access when they leave the company.

Microsoft System Center Configuration Manager (SCCM)

Computer and network devices discovered by SCCM can be managed in VIZOR, extending asset life-cycle management, allocation workflows that goes beyond SCCM's capabilities.

Microsoft Excel

Easily import existing spreadsheets with computer inventories, software licenses and/or IT purchases into VIZOR. Frequent imports can be automated using VIZOR's import scheduling feature.

Microsoft Dynamics

Integrate with an external purchasing system, such as Microsoft Dynamics, used by the procurement or accounting departments to access service/maintenance contracts, purchasing agreements, supplier information right in VIZOR.

Microsoft SharePoint

Leverage your organization's current investments and link directly to documents from your SharePoint account in VIZOR.

Crystal Reports

VIZOR includes a library of built-in reports. You can also create custom reports with VIZOR's custom report builder. You can even transfer the information to Crystal Reports, if you prefer the BI tool.

Lansweeper

Manage network devices discovered by Lansweeper in VIZOR. Extend Lansweeper's agent-less, multiple platform network discovery capabilities with VIZOR's best practice IT Asset Management processes.

Alfresco

Link assets and software licenses to purchase orders, invoices, warranty and contract documentation held in your Alfresco account.
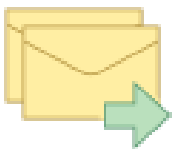

G Suite / Chromebook Management Console

Easily manage lending out Chromebooks and their repairs. VIZOR automatically synchronizes with device data from Google's G Suite / Chromebook Management Console.

SolarWinds

Computers and network devices discovered by SolarWinds can be managed in VIZOR, extending asset life-cycle management, provisioning workflows beyond SolarWinds capabilities.

Email Integration

VIZOR integrates with email services including on-premise Exchange and cloud-based Office 365. Email integration enables processing tickets submitted by email as well as sending notifications and reminders.

NEED ANOTHER INTEGRATION?

VIZOR has a simple data import tool which permits scheduled synchronization against most data sources. VIZOR also has an open standards-based API and VIZOR's adapter model permitting custom integrations when requested.
