

Software Asset & License Management Features

SOFTWARE MANAGEMENT

Automate Onboarding

Predetermine employee requirements and set up VIZOR to automatically allocate the licenses to new employees.

Automate License Allocation

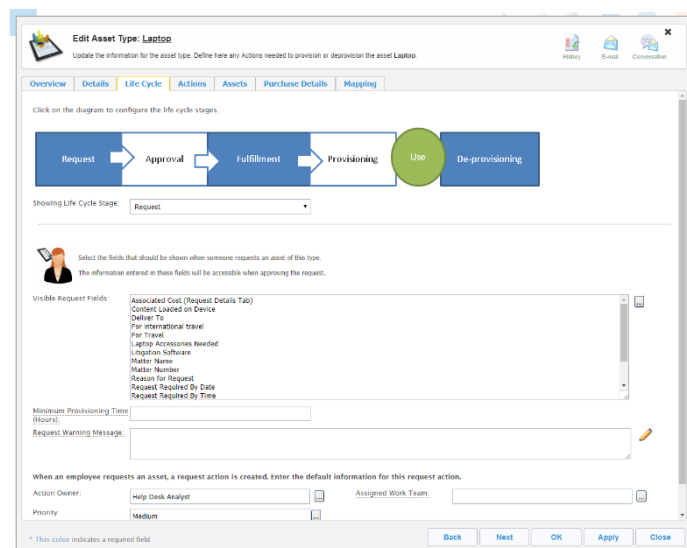

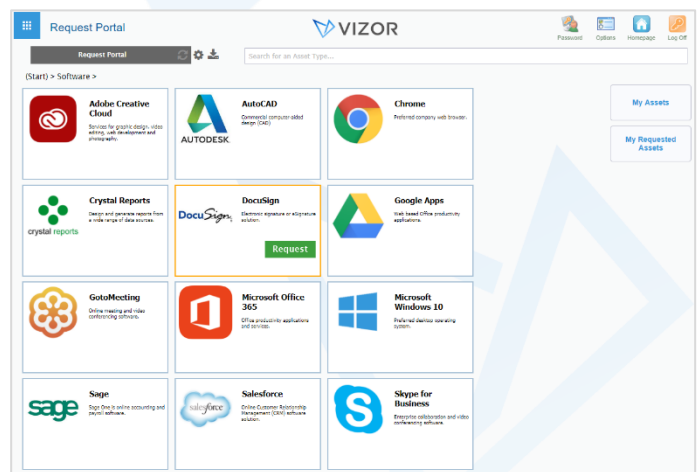

Automatically allocate licenses to the appropriate employee or assign it to a computer, department or location.

Manual License Allocation

Manually allocate licenses to the appropriate employee or assign it to a computer, department or location.

Request Portal

Use the software license portal to help streamline software requests and never leave IT in the dark (no shadow IT) about new software purchases.

Multi-level Approvals

Streamline multi-level approvals with automated reminders and contingencies when approvers are on vacation.

License Compliance

VIZOR compares purchases to installations and determines whether you are license compliant. It supports different compliance schemes like per CPU and per core licensing.

License Recycling

Automatically remove licenses from employees when they leave the company or change departments.

License Key Allocation

Allocate license keys and serial numbers to specific users or computers based on the vendor's requirements.

Network Discovery

Grabs installations off Windows desktops, laptops, servers and virtual machines into your VIZOR solution.

Store Documents

Store documents related to your license purchase agreements, maintenance contracts and service costs in VIZOR.

EXPENDITURE

Track Costs

Easily track purchase costs, costs over time and maintenance costs about your software licenses, entitlements, and subscriptions.

Forecast Costs

Based on previous software purchases in VIZOR, the solution can help you forecast software expenditures.

Set up Recurring Purchases

Monitor cloud or SaaS subscriptions by automatically updating their costs in VIZOR. Examples include Salesforce, Amazon AWS, and Microsoft Azure.

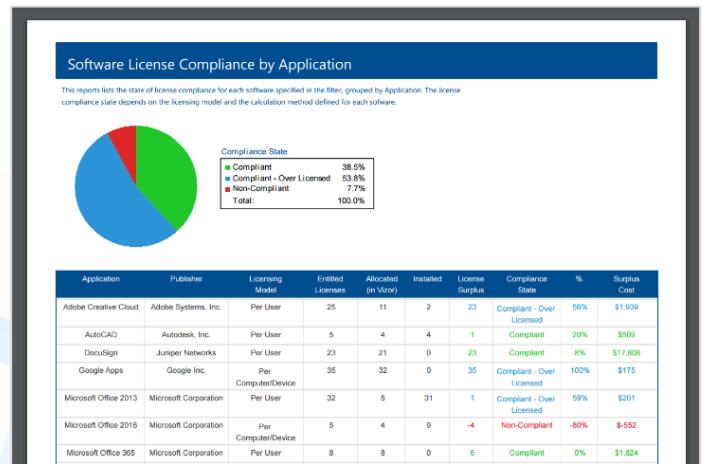

EFFICIENCY

Timely Reminders

Stay on top of license subscriptions, maintenance and renewals with timely email alerts and reminders.

Effective License Position Report

Find out if you are license compliant by simply viewing the Effective License Position report for a status update.

Licenses Alerts

Get alerted when you surpass a certain number of licenses. Likewise, set up alerts for when you are non-compliant.

Reserved Licenses

From your pool of licenses, reserve a set of licenses to a department or project. Then, the manager can distribute accordingly.

Software Inventory Normalization

Transform raw inventory data about your software and licenses into usable information (removes garbage versions, patches and driver updates).

Suite Consolidation

Furthermore, group identified applications into suites or software bundles.

Export Data

Quickly download software data in multiple formats including CSV, XSL or HTML for reports.

Activity Tracking

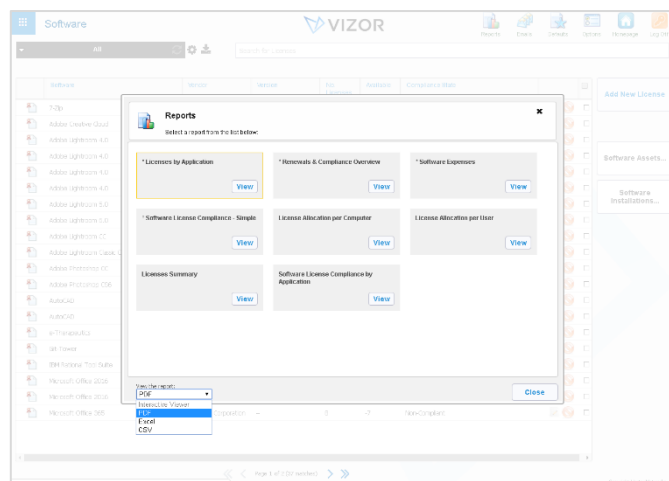

Track any changes made to a software asset (like an update or new allocation) through the activity log and the *history*.

Vendor Management

Store vendor information, like contracts and warranties, with their corresponding software licenses in VIZOR.

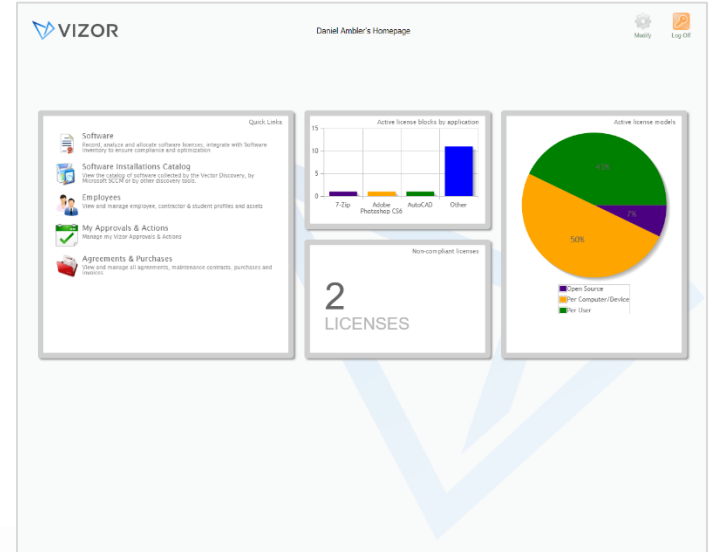

Powerful Reporting

Export one of the out-of-the-box reports or use the custom report builder to extract the key performance indicators most important to your organization.

Subscribe to Reports

Simply subscribe to a report and set the frequency you want to receive it. No need to create reports every week or month!

PERSONALIZE

Custom Fields

Organizations can customize fields in their VIZOR solution, allowing them to follow their industry standards.

Custom Filters and Queries

VIZOR makes it easy to sort through data with pre-set queries, categories, a search bar and the ability to customize filters.

Personalized Dashboard

VIZOR's dashboard can be personalized to display the most important key performance indicators to your job role.

Include Your Logo

The color of your solution can be changed and even display your organization's logo for an exceptional internal branding experience.

INTEGRATIONS

Notable integrations:

Microsoft SCCM

Extend asset lifecycle management and allocation workflows In VIZOR that goes beyond SCCM's capabilities.

Active Directory

Create new Active Directory accounts with specific privileges for new employees and then revoke access when they leave the company.

Email Integration

VIZOR integrates with email services including on-premise Exchange and cloud-based Office 365.

VIZOR ADD-ONS

Some have additional costs:

Custom Licensing Compliance Engine

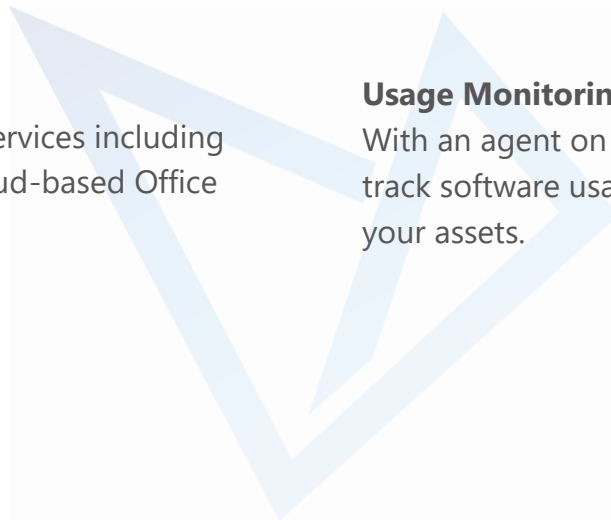

If a vendor has a unique license distribution, VIZOR can support custom license compliance calculations for an accurate Effective License Position.

License Key Discovery

Track discoverable license keys stored in computers and link them to the appropriate software asset or license record. For certain software, this may help you identify potentially incorrect installations.

Usage Monitoring

With an agent on every computer, VIZOR can track software usage for a deeper analysis of your assets.
