

VIZOR ITIL® Certified

VIZOR (developed by Vector Networks) has been officially certified as ITIL® compatible by PinkVERIFY™, an independent and internationally recognized ITIL tool assessment and certification body.

VIZOR has been objectively assessed by Pink Elephant's experienced consultants against ITIL terminology, functionality, integration and workflow requirements for Asset Management, Incident Management, and Request Fulfilment processes.

What is PinkVERIFY™ 2011 certification?

PinkVERIFY™ certification is a tool certification program which ITSM/ITAM tool vendors can undertake. It provides IT practitioners with an unbiased view of a tool's ITIL capabilities.

Why is PinkVERIFY™ certification important?

PinkVERIFY™ certification allows IT practitioners to identify software tools that support their ITIL/ITSM/ITAM processes. When choosing a tool, IT practitioners are encouraged to look for the PinkVERIFY™ certificate of approval or the PinkVERIFY™ logo.

How was VIZOR assessed?

An ITAM/ITSM tool vendor must meet 100 percent of the criteria and undergo a scrupulous assessment by Pink Elephant's consultants to achieve PinkVERIFY™ certification. VIZOR has cleared this assessment and received certification confirming its alignment with ITIL best practices.

When was VIZOR certified?

VIZOR was certified in February 2019.

What ITIL processes is VIZOR certified for?

VIZOR has been assessed and certified for Asset Management, Incident Management, and Request Fulfilment processes.
