

IT Asset Management Features

VIZOR's IT Asset Management module is ready out-of-the-box to help streamline processes and manage the entire lifecycle of your assets. Here are the top 10 features most beloved by our customers, followed by several features that makes VIZOR stand out from other ITAM solutions on the market.

TOP 10 FEATURES

1. Know who has what

Assets can easily, even automatically, be allocated to employees providing department and asset managers with full asset visibility. If an employee leaves, asset recovery is ensured.

2. Location Tracking

Track where assets are located, including what building, campus, and even specific room and floor.

3. Network Discovery

Automatic discovery of Windows desktops, laptops, servers, printers, routers and switches to populate your hardware and software inventory.

4. Check-in/Check-out (Inventory)

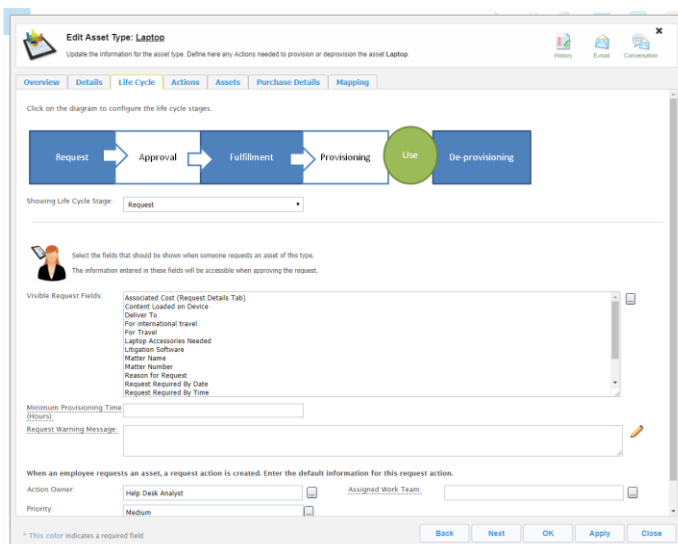

Manage lending out equipment including, requests, check-out, accountability, check-in and inventory. When checking a device in or out, information such as person's first and last name, department, and ID picture appear on the screen. The process can also be streamlined by scanning the barcode on an employee ID card and the device's ID.

5. Powerful Reporting

Export one of the out-of-the-box reports or use the custom report builder to extract the key performance indicators most important to your organization.

6. Active Directory Integration

Create new Active Directory accounts with specific privileges for new employees and then revoke access when they leave the company.

VIZOR is available in the cloud or on-premises

Also, use the Active Directory to authenticate and populate employees in VIZOR.

7. Microsoft SCCM Integration

Integration with Microsoft SCCM makes it easy to compliment your current infrastructure with powerful IT Asset Management processes from VIZOR.

8. Employee Onboarding

Predetermine employee requirements and set up VIZOR to automatically trigger tickets to be allocated to new employees.

9. Track Costs

Easily track purchase costs, service agreements, asset depreciation and repair costs about your assets as well as breaking down costs by department and allocation.

10. Track Repair/Maintenance Costs

Track *Repairs* in VIZOR, including information associated to the repair like the cost, parts repaired, and vendor. The repair section also has a checklist to help diagnose the device's problem and keep track of what has been tested.
