Software Asset & License Management Features

VIZOR's Software Asset & License Management module is an ITIL certified solution that makes it easier to manage software licenses and associated purchases. Here are the top 10 features most beloved by our customers, followed by several features that makes VIZOR stand out from other solutions on the market.

TOP 10 FEATURES

1. Timely Reminders
Stay on top of license subscriptions, maintenance renewals and compliance position with timely email alerts and reminders.

2. Effective License Position Report
Find out if you are license compliant by simply viewing the Effective License Position report for a status update.

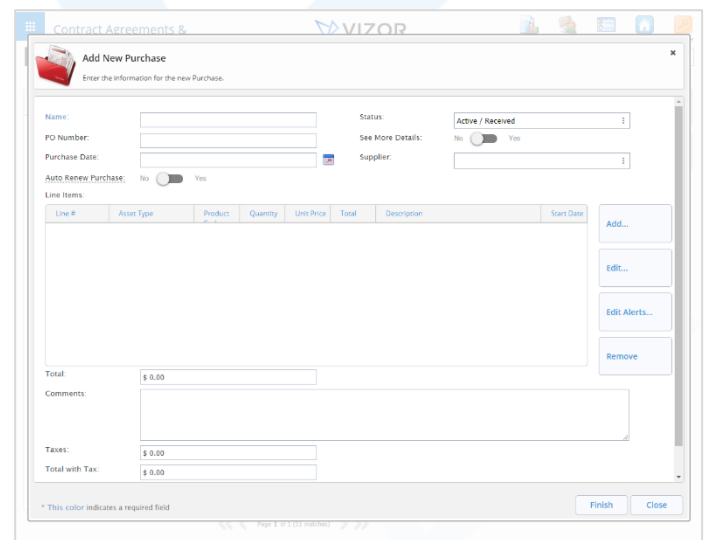

Over-Licensed Alerts
Get alerted when you surpass a certain number of licenses. Likewise, set up alerts for when you are non-compliant.

3. Managing Cloud and SaaS Subscriptions
Although known for managing lifecycles of software licenses, VIZOR is capable of managing subscriptions as well.

4. Vendor Management
Store vendor information, like contracts and warranties, with their corresponding software licenses and purchases in VIZOR.

5. Powerful Reporting
Export one of the out-of-the-box reports or use the custom report builder to extract the key performance indicators most important to your organization.

Subscribe to Reports
Simply subscribe to a report and set the frequency you want to receive it. No need to create reports every week or month!

VIZOR is available in the cloud or on-premises

6. Active Directory Integration

Create new Active Directory accounts with specific privileges for new employees and then revoke access when they leave the company. Also, use the Active Directory to authenticate and populate employees in VIZOR.

It is possible to import your Software Assets from a spreadsheet!

7. Software Normalization

After obtaining the data about your software assets from a spreadsheet, Microsoft SCCM or our Discovery Tool, VIZOR transforms raw inventory data into usable information for license and software asset management by eliminating noise from inventory data such as garbage versions, patches and driver updates.

8. Employee Onboarding

Predetermine employee requirements and set up VIZOR to automatically allocate the licenses to new employees.
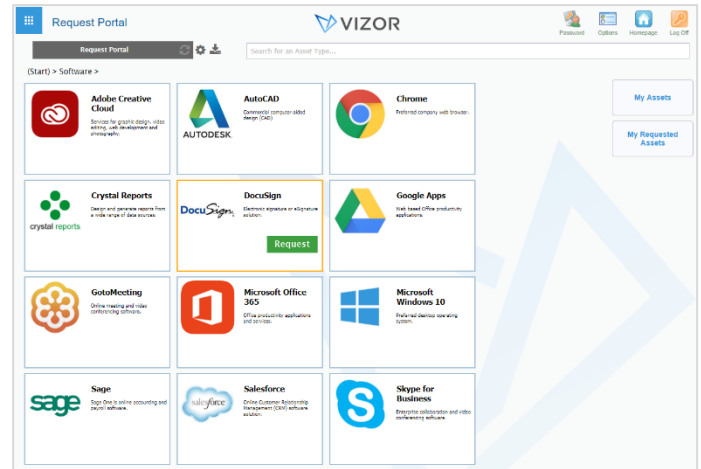

9. Microsoft SCCM Integration

Integration with Microsoft SCCM makes it easy to compliment your current infrastructure with powerful IT Asset Management processes from VIZOR.

10. Document Repository

Central repository for proof of purchases and certificates related your software assets. Upload documents into VIZOR or link to documents from your SharePoint and/or Alfresco accounts.
