VIZOR

The Benefits of using VIZOR Software & License Management Module

Quicker ROI

VIZOR's features have been compared to high-quality tools like BMC Remedy and HP. However, customers choose VIZOR because of our affordable pricing. Our solution is up to 40% less than competitors, allowing our customers to reach their return on investments much faster.

Protect Information

90% of former employees can access a company account after they leave the firm. [1] VIZOR can remove access to accounts and documents as soon as an employee leaves the organization.

Follow Best Practices

VIZOR is ITIL certified for Asset Management, ensuring your organization is following best practices. Plus, VIZOR's streamlined and automated processes helps your organization maintain a competitive edge.

Stay Proactive

VIZOR is a proactive solution, sending IT departments notices when their software is over or under compliant, and reminder emails for updates and renewals.

Save Costs with License Recycling

An 18% average turnover rate can lead to thousands of forgotten licenses that could have been recycled if they were properly managed. [2] VIZOR stores and redistributes licenses when needed.

Centralize Purchasing

Eliminate departmental silos by centralizing software purchases with a request portal. This removes duplicate licenses and creates opportunities for quantity discounts.
