

VIZOR for Chromebooks

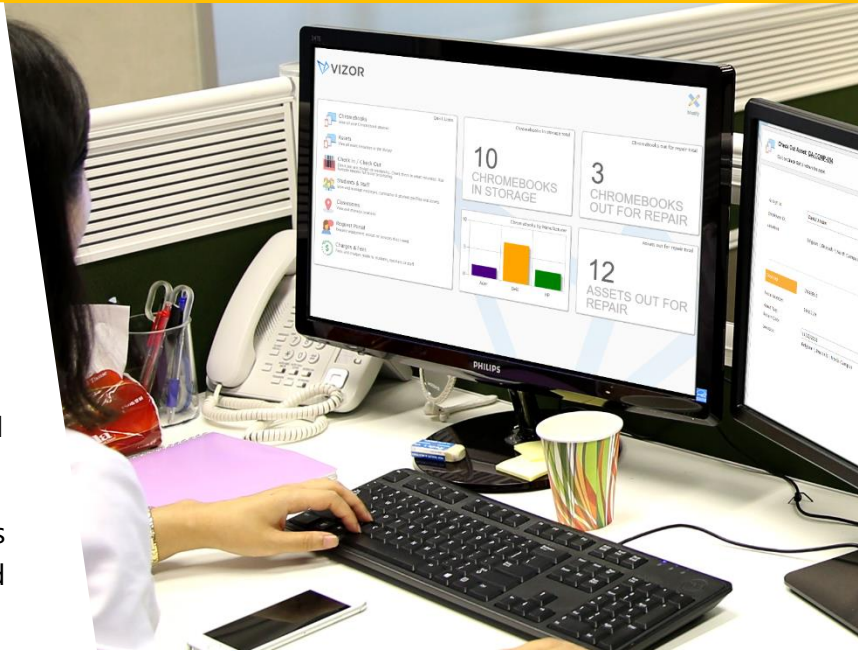

Facilitate Chromebook allocation to students, 1:1 programs and device repairs

VIZOR for Chromebooks helps School Districts manage Chromebooks by consolidating data and streamlining IT processes.

VIZOR for Chromebooks consolidates student information and device data in one easy-to-use Web-based system. As a result, you know who has what, can easily track repairs and update device metadata in bulk.

VIZOR also keeps students accountable for their devices. By sending automated notifications, students are reminded when to return devices and when a charge is due. To keep costs under control, financial information relating to Chromebooks, such as purchase details, warranties and repair chargebacks, can also be managed with VIZOR.

VIZOR integrates with Google G Suite, PowerSchool and IT solutions including and Microsoft Endpoint Manager (SCCM) to streamline key IT processes specific to education, such as allocating Chromebooks to students.

Top Features Schools Need

School Districts choose VIZOR for Chromebooks because of these features:

- Seamless integration with G Suite
- Facilitate 1:1 program device allocation
- Check-in / Check-out device loans to students
- Repair management and chargebacks
- Bulk device data update
- Sync student information from PowerSchool

VIZOR – Award Winning and ITL Certified

G Suite Sync

Extend the native capabilities of G Suite to better manage your Chromebook inventory. G Suite sync also makes it possible to trigger processes in VIZOR, like notifications, based on a device's organizational unit.

Repair Management

Track and diagnose each repair and its associated cost with VIZOR. Repair costs can be charged back to schools, faculties, students or parents.

Manage Check-out Programs

Easily manage mass Chromebook allocation to students. VIZOR also integrates with barcoding systems to accelerate device distribution, loans and returns.

Facilitate Distribution

Whether you have a 1:1 program, order Chromebooks in bulk or purchase a few at a time, VIZOR helps you distribute your devices. Keep track of which schools have which laptops, who is using which device, and when each one needs to be returned.

Bulk Update Metadata

Make changes to your Chromebook device metadata in bulk. For example, if you need to update a warranty for hundreds of devices, make the change in VIZOR and it will update all your Chromebooks at once.

PowerSchool Sync

PowerSchool synchronization makes it possible to associate devices with your students. This makes it easier to distribute Chromebooks, check-in devices for repair, notify parents when their child needs to return a device.

More notable features in VIZOR for Chromebooks
