

Software & License Management Module

VIZOR Software Asset Management modules centralizes all software license entitlements, from cloud subscriptions to enterprise agreements. VIZOR stores detailed information related to your software assets and licenses including purchasing information, documentation and allocation.

VIZOR also ensures you remain compliant with clear and accurate reports detailing your effective license position and identification of unauthorized software installations. Receive timely reminders when maintenance contracts and cloud subscriptions are due for renewal and stay informed on current and forecast software expenditure with powerful analytics reporting.

License Repository

Central repository for all details related to your license entitlements including supplier information and related documentation, so you can easily manage multiple purchases, agreements and maintenance contracts. Software expenditure is broken down, providing a clear view of total costs and average costs per user. VIZOR also enables simple allocation of licenses to users, computers, departments and locations.

Automation

Easily allocate software and cloud services to new employees ensuring they are productive from day one. Role Based Provisioning ensures each user is allocated exactly what they need based on their attributes such as job title or their position on a project. Automatically return licenses back to the pool when employees leave or no longer require the software.

Request Portal

VIZOR's software request portal is an app-store for your organization. End users or their managers can request software applications or cloud services, reducing overspending and waste from over provisioning. Requests pass through multi-level approval processes, eliminating shadow IT and helping towards compliance.

Compliance

Manage your software license compliance status with clear and accurate reports detailing your effective license position. VIZOR supports complex compliance schemes such as per CPU and per core licensing models. Also, powerful over licensed reports detail the cost of surplus licenses in your organisation.

Cloud or On-Premises

Flexible deployment options in the cloud or locally installed or on your premises

Dashboards & Reports

Stay informed on past, present, and future software expenditure throughout the software lifecycle with powerful analytics reporting. Edit existing reports or create your own tabular, listing and detail reports with charting using VIZOR's custom report builder.

Email Alerts & Reminders

Avoid renewal penalties with out of the box and custom notifications. Stay on top of maintenance & cloud subscriptions renewals and your compliance position with timely email alerts and reminders.

Microsoft ECM

Software discovered by ECM (Endpoint Configuration Manager, formally SCCM) can be managed in VIZOR, extending license management beyond ConfigMgr's own capabilities. Also, leverage existing application deployment infrastructure in ConfigMgr to automate software delivery using VIZOR's provisioning workflows.

Documentation

Central and secure repository for all proof of purchase documentation and certificates related to your software assets. Upload documents to VIZOR or link to documents from your SharePoint, Alfresco or similar repository to leverage your organization's investments in security and efficiency.

Software Discovery

VIZOR's built-in network discovery finds and audits Windows desktops, laptops, servers and virtual machines. Comprehensive software inventory utilizes multiple interrogation techniques.

Manage Subscriptions

In addition to traditional on-premise software licenses, also manage and track (auto)renewing cloud service subscriptions for web apps like Salesforce and cloud computing platforms such as Amazon AWS and Microsoft Azure.

Software Normalization

Transform raw inventory data into usable information for license and software asset management by eliminating noise from inventory data such as garbage versions, patches and driver updates.

Purchasing Integration

Integrate with purchasing systems, from an Excel Spreadsheet to Microsoft Dynamics. This allows your team to view and simply select the relevant purchase orders and/or line items and link them to an appropriate license or subscription.

A screenshot of the VIZOR interface showing a detailed view of Microsoft Office 2019 licenses. The interface includes a navigation bar with tabs like 'License', 'Purchases', 'Keys', 'Allocation', 'Installations', 'Compliance', 'Details', 'Description', 'Business', 'Related Licenses', 'Documents', and 'Analytics'. Below the navigation bar, there is a table of 'Related Purchases' with columns for Start Date, End Date, Type, Quantity, Cost, Status, PO Number, and Purchase Date. The table contains several rows of purchase data. Below the table, there is a summary section for 'Costs Over Time' and 'Average Costs per Unit' with various cost breakdowns.

Start Date	End Date	Type	Quantity	Cost	Status	PO Number	Purchase Date
12/28/2016	12/28/2017	Maintenance	10	\$ 150.00	Inactive	PO803945	11/28/2017
12/28/2016		New License	10	\$ 1,500.00	Active / Received	PO487221	12/28/2016
11/28/2017	11/28/2018	Maintenance	8	\$ 1,424.00	Inactive	PO105345	11/28/2017
12/28/2017		New License	10	\$ 1,500.00	Active / Received	PO122022	12/28/2017
11/28/2018	9/30/2020	Maintenance	12	\$ 1,680.00	Active / Received	PO836211	11/28/2018
12/28/2018		New License	3	\$ 540.00	Active / Received	PO836202	12/28/2018

Active Directory

Synchronize VIZOR with user accounts from Active Directory and LDAP directories. With single sign-on, users are automatically authenticated and directed to their personal VIZOR homepage without requiring additional sign-on.
