VIZOR

Chromebook Management for K-12 Schools & Districts

VIZOR consolidates device data from Google with student information in one easy-to-use web-based system. As a result, schools know who has what, can easily track repairs, and simplify 1:1 initiatives.

Google Admin Console Integration

Extend the native capabilities of the Google Admin Console to better track and manage your Chromebook inventory in one easy-to-use web-based interface.

Track Chromebook Repairs

Track and diagnose each repair and its associated cost with VIZOR. Repair costs can be calculated and charged back to students or parents.

> "All of our infrastructure assets, end user devices, projectors and displays and their purchase information is accessible in VIZOR. Before VIZOR it took minutes to check-out each device, it now takes seconds."
>

Simplify 1:1 Initiatives

Easily manage mass Chromebook allocation to students. VIZOR integrates with barcode readers to accelerate 1:1 device distribution, loaners, swap-outs and returns.

VIZOR

VIZOR helps Schools and School Districts reduce the workload of managing Chromebooks and other IT assets by consolidating data and streamlining processes.

- Comprehensive dashboards and reporting makes it easy to keep track of which schools have which Chromebooks, who is using which device, and its current life-cycle state.

- VIZOR has specific functionality for managing Chromebooks but School Districts can manage all IT devices and assets in VIZOR, such as iPads, Projectors and Carts.

- Email notifications can be sent to students, parents and teachers when a device is due for return or ready to be picked up.

- Automatically disable lost, stolen or overdue return Chromebooks while notifying parents, all in one click.

- Keep costs under control with all financial information relating to Chromebooks, such as purchase details, warranties, insurance status and funding program sources in VIZOR.

- Automatically identify problem 'lemon' devices which have had multiple repairs beyond your configured threshold.

- Unique bi-directional Google Admin console integration ensures your Chromebook inventory is always accurate, enables bulk OU device allocation and Google account single sign-on.

- VIZOR integrates with Student Information Systems, such as PowerSchool SIS, making it easier to distribute Chromebooks, check-in devices for repair and notify parents of issues.

- Self-service portals for teachers, principals, librarians, students, and parents ensures all 1:1 initiative stakeholders have appropriate visibility of devices assigned to them.
