VIZOR

VIZOR helps IT administrators reduce the workload of managing IT assets by consolidating data and streamlining processes.

User customizable dashboards provide IT asset managers and analysts with the information they need at a glance.

VIZOR centralizes management of all your IT assets and devices. Track the lifecycle of desktops, laptops, projectors and even lengths of network cable.

VIZOR ensures managers stay on top of all IT processes such as asset warranty expiry and lease renewals with timely email alerts and reminders.

VIZOR manages the entire asset lifecycle, from employee request, through approval, procurement, provisioning and eventual retirement.

Manage all asset purchasing information, including service and maintenance contracts, purchasing agreements, asset depreciation and supplier information.

Warranty information is automatically populated for Dell and Lenovo devices. VIZOR will also identify lemon assets which have had multiple repairs above your defined threshold.

VIZOR's unique role based provisioning functionality ensures necessary approval and then streamlines asset delivery to users based on requirements of their role and projects.

Synchronize user accounts from Active Directory. With single sign-on, users are automatically authenticated and directed to their personal VIZOR homepage.

VIZOR's request portal is an enterprise IT store for your organization. End users can request exactly what assets they need, when they need it, thereby reducing waste of over provisioning.
