

IT Asset Management for K-12 Schools & Districts

VIZOR is an IT asset management solution designed specifically for K-12 schools and districts. VIZOR includes best practice out-of-box workflows for K-12 asset management processes, such as 1:1 check-out, repair fee calculations and loaner / swap-outs.

School District Asset Inventory

VIZOR manages the complete life cycle and purchase of all school district assets. Know exactly who has what asset, where assets are located and keep an accurate stock inventory.

Track Asset Repairs and Cost

Track and diagnose each asset repair and its associated cost with VIZOR. Repair costs can be charged back to schools, faculties, students or families.

“All of our infrastructure assets, end user devices, projectors and displays and their purchase information is accessible in VIZOR. Before VIZOR it took minutes to check-out each device, it now takes seconds.”

Director of Technology
Echo Horizon School

Manage 1:1 Programs

Easily manage mass device allocation to students. VIZOR integrates with barcode readers to streamline 1:1 device distribution, loaners and returns.

VIZOR helps K-12 schools and districts reduce the workload of managing IT assets by automating processes and centralizing data.

Comprehensive dashboards and reporting makes it easy to keep track of which schools have which IT assets, who is using which device, funding sources and life-cycle planning.

School Districts can manage all IT assets and devices in VIZOR. Track the lifecycle of Laptops, Chromebooks, iPads, Projectors, TVs, Carts and even lengths of network cable.

Save thousands by reducing the number of unreturned devices with automated email notifications.

VIZOR helps districts distribute 1:1 devices to students in bulk. Keep track of which schools have which laptops, who is using which device, and monitor inventory stock levels.

Keep costs under control with all financial information relating to IT assets, such as purchase details, warranties, insurance status and funding sources in VIZOR.

Warranty information is automatically populated for Dell and Lenovo devices. VIZOR will also identify lemon assets which have had multiple repairs above your defined threshold.

Unique bi-directional Google Admin console integration ensures your Chromebook inventory is always accurate, enables bulk OU device allocation and Google account single sign-on.

Synchronize student, teacher, staff and family data directly from your SIS, such as PowerSchool. No more cross-referencing spreadsheets and systems to find relevant contact information.

Self-service portals for teachers, principals, librarians, students, and families ensures all 1:1 initiative stakeholders have appropriate visibility of device assignment.
