VIZOR

iPad Management for Schools & Districts

VIZOR helps schools manage 1:1 iPad programs. Keep track of which students have which device and monitor inventory stock levels. Unique workflows automate allocation, loaners and returns to improve 1:1 processes and reduce workload.

Simplify 1:1 Initiatives

Easily manage mass iPad allocation to students. VIZOR integrates with barcode readers to accelerate 1:1 device distribution, loaners, swap-outs and returns.

Track iPad Repairs

Track and diagnose each repair and its associated cost with VIZOR. Repair costs can be calculated and charged back to students or parents.

> "All of our infrastructure assets, end user devices, projectors and displays and their purchase information is accessible in VIZOR. Before VIZOR it took minutes to check-out each device, it now takes seconds."

Mobile Device Management Integration

VIZOR integrates with MDM solutions, such as Jamf, providing a single pane of glass for student device management and ensuring your iPad inventory is always accurate.

VIZOR

VIZOR helps Schools and School Districts reduce the workload of managing iPads and other IT assets by consolidating data and streamlining processes.

Comprehensive dashboards and reporting makes it easy to keep track of which schools have which iPads, who is using which device, funding sources and life-cycle planning.

VIZOR has specific functionality for managing iPads, but School Districts can manage all IT devices and assets in VIZOR, such as Chromebooks, Windows Laptops, Projectors and Carts.

Email notifications can be sent to students, families and teachers when a device is due for return or ready to be picked up.

View iPads by their location such as School and Classroom. Principals and teachers from a specific school can be configured to only view devices allocated to their school.

Keep costs under control with all financial information relating to iPads, such as purchase details, warranties, insurance status and funding sources in VIZOR.

Automatically identify problem 'lemon' devices which have had multiple repairs beyond your configured threshold.
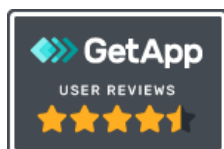

VIZOR integrates with MDM solutions, such as Jamf, providing a single pane of glass for student device management and ensuring your iPad inventory is always accurate.

VIZOR integrates with Student Information Systems, such as PowerSchool, Infinite Campus & Skyward, making it easy to distribute iPads to students and notify parents of issues.

Self-service portals for teachers, principals, librarians, students, and families ensures all 1:1 initiative stakeholders have appropriate visibility of device assignment.
